COTTON MARKETS

More Rains in Belt Aggravate Spot Situation and Prices Work Higher.

Tuesday afternoon, Oct. 31.

As if the market did not aiready have enough that was buillish, there were some injurious rains in important sections of the belt over night which added fuel to the flames aiready burning furiously, and prices worked to new high levels today, amid trading which was moderate in volume. Behind the market there is still the scramble for the kind of cotton that apinners seem to think is going to be extremely scarce and an unsatisfied short interest. The spot market news during the day was indefinite, except all said the rush to buy was as keen as ever and nobody could tell how much quotation would likely be advanced in the afternon.

The rains were worst in Northeast-

Missinsippi and Tennessee. Some very
heavy ones were reported in Texas and
Oklahoma, doing damage, in sections
whence some good reports had been
coming up to recently. The indications
were for more rains, although some
cooler is expected to follow; but perhaps the worst had been seen this
morning. Some wires from Baris, Tex.
said fields were two feet deep in water.
These rains started yesterday afternoon, but were worst early this morning. The rest of the belt, ecept lower
Texas, had no rain, but may get some
before the cool spell comes to check
them.

There was an expectation of a very
aullish private ginning report some time
daring the day, which stimulated some
cutying of contracts, but up to a short
while before the close nothing definite
had been received. This was rather an
excuse than a reason for the market's
strength. The certaus report Saturday
morning is expected to be bullish and
will compare with nearly 7,000,000 bales
ginned to even date a year ago.

Liverpool again came much beter than
due and showed that the scramble for
the actual was not over it that direction. Finals were very steady and

Soots were marked up 34 points, middling to 22,30d, with sales 10,000 bales
and yarns a fair business was doing.
Opening prices on this side reflected
good cables and the weather and spot
news. December opened 24 points up
at 34.75, and soon soid up to 34.90. But
there developed a little more disposition
to turn loose long holdings in that position and to absorb offerings in the
later positions, which marrowed differences some. December dipped to
34.74, but then improved on more detailed reports from the weather and
anticipation of buillish ginning figures
and firmness in spots. Later in the
day the option soid up to 35.14, the entire list being at new high marks for

UPUN GOLD STANDARD

SANTIAGO. Chile. Oct. 21.—The Chilean government is endeavoring to relieve the pressure of the high cost of living by stabilizing the rate of exchange. felt to have much influence on the present exchange rates.

The rise of sterling exchange is attributed in part to an adverse balance of trade against Chile in 1918 to the amount of \$7,000,000. This difference has to be paid in gold, consequently the peas declines in value.

Chileans have been affected by the increased cost of living like the rest of the world, and there have been public demonstrations, meetings of labermen and congressional debates on retrictions of exports of foodstuffs, and upon providing work for the unemployed.

Nitrate, which is the mainstay of Chilean industry, has been out of the market for several months, owing to the slump in the demand, resulting from the end of the war and the scarcity of freight steamers. This threw thousands of workers out of employment. To meet this labor situation the government proposed measures providing for the expenditure of several million dollars in construction of high-ways and railways.

HUN MARINES SEEK OTHER SERVICE JOBS

Frankfort-on-the-Main say that the marine detachment which has been dominant in that city since the revolution is to be dissolved and the men enlisted in the state police service i

enlisted in the state police service if they so desire.

The marine detachment in Frankfort is one of the queerest military developments in all Germany since the revolution, according to American officers who specialize on German military affairs. It was originally self-appointed and has always exercised its command without any regular permission from higher authority, yet it has been in practical control of Frankfort for months. The officers and men are of Spartacist tendencies, yet they have been moderate in their actions and the citizens are said to be well satisfied with the manner in which the organization maintained public order.

It has been understood among the Americans that the Ebert government desired to suppress the detachment and replace it with Noske troops on the ground that Frankfort was continuing to be a breeding place for communists.

ENGLAND LAUNCHES BIG RAIDER HUNTER SHIP

LONDON, Oct. 21.-The first of new type of British cruiser, the Raleigh, launched a few days ago, is expected to give the navy trouble to find her suitable work.

The Raleigh is of 9.750 tons, with a speed of 15 knots. She was designed to hunt raiders such as the Moewe and the Wolf. She was given guns larger than the guns usually placed on light cruisers so She might be able to outrange any commerce raider the enemy might send out. Now that there are no German raiders, it is conceded by the navy that she is much in the nature of a white elephant, being too costly for a light cruiser, and too light for service with a battle cruiser squadron.

The Raleigh is armed with 7.5-inch guns, provided with an underwater bugs? which designed to make her torpedo proof, and is so divided that any two of her main compartments may be flooded without endangering the vessel. She has anti-aircraft guns and burns oil fuel only. eigh, launched a few days ago, is ex-

CHICAGO, Oct. 21—Corn jumped up in price today as a result of action by the railroad administration putting into force the permit system of moving grain. Arrivals of corn at primary markets were expected to be minimised. Opening prices ranged from 'se to 1'ac higher, with December \$1.25 to \$1.25\cdots\$, but were followed by a reaction after the initial rush of buying had been satisfied.

Later the demand groved to have far less energy than had been looked for and the market weakened owing more or less to the depressing effect of a big drop in the price of hogs. The close was heavy 1'so to 2'so het lower, with December \$1.25\cdots\$ to \$1.21\cdots\$ and May \$1.21\cdots\$ to \$1.21\cdots\$ and May \$1.21\cdots\$ to \$1.21\cdots\$ and market made a slight further gain and then began to sag.

WOMEN POLICE MAKE GOOD, LONDON SAYS

LONDON, Oct. 21.-After ten months f trial the higher authorities of the Metropolitan police have decided that women police officers have made good, and the 100 now on duty will be retained. They must be of good education, possessing tast kindliness and a
sympathetic nature willing to work
seven hours a day for \$10 a week, and
be ready at all times for duty.

The force was recruited from the
patrol workers of the National Union of
Women Workers employed by the commissioner in 1916 to aid in the protection of the city. They did, excellent
work, but last November it was felt
that the pressing need for them had
passed, and they were dishanded.

The cessation of hestilities, however,
brought thousands of young officers
from the fighting front to London, and
the fear that an orgie of dissipation
might follow the rigors of life in the
trenches induced the police to retain
100 picked women for duty in the night
life sections.

Their work was prevenive in a lesse tained. They must be of good educa-

life sections.

Their work was preventive in g large measure, particular attention being devoted to young girls who might be attracted to such places. So well did they carry out the pian that their permanent worth has now been recognized.

they carry out the plan that their permanent worth has now been recognized.

These policewomen may be seen any night in the West End, covering regular beats near the theaters and hotels in pairs, dressed in navy blue, with a business-like cap and regulation whistle; they work under the direction of a woman chief, whose headquarters are in Scotland Yard. If a woman is accosted by some man who does not know her she can cause his arrest by appealing to the woman officer, and it frequently happens arrests are made without complaint.

All women applicants for the force are trained for eight weeks in the regular duties of a policeman, but they are not sworn in as constables, and they are only liable for such duty as the commissioner may direct.

"All our women are most carefully chosen," said their chief, Mrs. Stanley, "but we have no place for the 'prude or the prowl."
